

ORAL HEALTH KANSAS

KANSAS SAFETY NET DENTAL CLINICS

It is important to go to the same dental office every time so the dentists and hygienists become knowledgeable about their patients and maintain important dental and medical records. This improves patient care and builds relationships. For people who look for dental offices that accept KanCare or fees based on patients' income, they have options in Kansas at safety-net dental clinics listed on this webpage: <http://www.oralhealthkansas.org/Safetynet.html>
