

## Enterprise Car Rental Program

Car rental rates are expected to rise substantially in the next year. A program has been worked out with Enterprise whereby Special Olympics is guaranteed special rates nationwide and these will not be subject to the annual price rise. The program can be used by staff, board members, teams, family members and volunteers throughout the state by using the sign up codes listed below. You are signing up to become an Enterprise Emerald Club account member.

The rate with Enterprise is set with Special Olympics nation wide and therefore when you complete the rental on line the system may not pick up any weekend specials or promotions that are being offered in a specific location. However, when you pick up your vehicle you can ask any manger to change your Emerald assignment to a weekend special if one is being offered and Special Olympics will still get credit for the business.

The benefit to Special Olympics is the more people who use the program booking through Enterprise or National the longer they will be able to offer the special rates. In addition, points can be earned towards free rentals. There is also an option to check the advantage of renting a vehicle using your own car using the link detailed below.

The linked rate agreement with NATIONAL Car Rentals guarantees the lowest rate available for that date and location. With ENTERPRISE the rates are the same nationwide; some locations will be better or worse depending on inventory. It is recommended by SOMO that you use NATIONAL for all AIRPORT rentals and ENTERPRISE for everything else.
